The Marine Conservation Society, in conjunction with Marks and Spencer, are delighted to be able to offer a choice of free marine themed classroom workshops for primary age children.

Designed to enthuse your students and ignite a passion for the sea, these interactive sessions are key to supporting learning in Science, English and Citizenship.

Each student will also receive a copy of our Wild Guide to Our Seas, which is packed with activities and information about our cool UK seas. Additional resources can also be found in our Cool Seas Explorer Centre at www.mcsuk.org/coolseas

If you have any questions or would like further information please do not hesitate to call 01989 566017 or email seachampions@mcsuk.org.

Workshop Options

Beside the Sea (5-7 yrs) Discover simple, fun things to do and see at the sea side, including rockpooling. 1 hour.

Aliens of the Deep (7-11 yrs) Find out about the vast depths of our ocean, learn how creatures adapt and design an ‘Alien of the Deep’. 1 hour.

Oceans Alive Assembly (5-11 yrs) An overview of the importance of our ocean, the human impacts on marine environments and the ways we can all help to conserve our seas. 1/2 hour.
