

Source to Sea Litter Survey

80% of the litter we find in our ocean comes from inland sources.
Your survey will help track litter items from source to sea.

About your survey

Date completed:

Where did you clean?

Town ☐ Countryside ☐ Playground ☐
Park ☐ Office grounds ☐ School grounds ☐
Street ☐ River/Canal/Lakeside ☐

First half of your postcode:

How long did you clean for?
Please input in minutes

How far did you clean?
Please input in metres

How many bags of litter did you fill?

Weight of litter (kg):

About your group

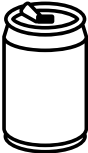

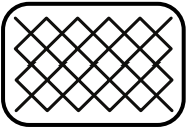

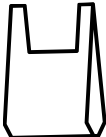

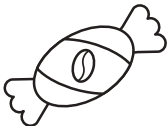

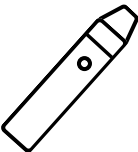

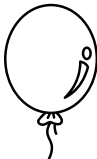

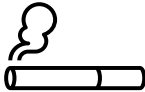

How many people are in your group?

If you are taking part as a group, what is the name of your organisation/school/group

What is the weirdest thing you found?

Did you encounter anything hazardous, or anything that may pose a threat to volunteers on future cleans that was raised during your briefing or during the event?

What to do – Spot the litter, write down what you found, then pick it up.
You can use a tally to keep track as you go along. |||

Plastic drink bottles  How many?	Loose plastic bottle caps/lids  How many?	Single-use cups (plastic/paper/polystyrene)  How many?	Glass bottles  How many?	Metal drink cans  How many?
Polystyrene fast food container  How many?	Disposable BBQs  How many?	Single-use plastic bags  How many?	Plastic bags for life  How many?	Wet wipes  How many?
Packets e.g. crisps, sweets  How many?	Vapes  How many?	Balloons  How many?	Cigarette butts  How many?	<i>Try to recycle the litter you collect if you can, but always keep yourself safe!</i>
